# QUALITY ASSURED!

Before they leave our production facilities, American Tourister products are performance tested, at fully loaded capacity, using our stringent quality control standards. We put them through tests more rigorous than you can ever imagine. This attention to quality and performance is what has made American Tourister Worldproof® for nearly a century.

**The Lock Test – Push & Release**  
The lock is operated continuously to test its durability.

**Handle Test**  
Twitches are given to the handle of the bag in a loaded condition to test its strength and durability.

**The Tumble Test**  
A loaded bag is subjected to tumbles in a large rotating drum with protruding obstacles to test the reliability of the parts.

**Wheel Test**  
A loaded bag is subjected to linear motion to test the reliability of the wheels.

**The Zipper Test – Force Applied to Sliders & Zippers**  
Force is applied to sliders and zippers to test the strength of the zippers and pullers.

**The Drop Test**  
A loaded bag is dropped on the ground on all corners.
